Three risks you face every single day.

1

Geopolitical dependency

Your collaborative tools run on US infrastructure subject to the Cloud Act. Transatlantic tensions make this dependency a real strategic risk to your business continuity.

2

GDPR & NIS2 compliance risks

Data protection and cybersecurity obligations are tightening across the EU. Non-compliance exposes your organisation to penalties and lasting reputational damage.

3

Rising costs & vendor lock-in

Microsoft 365 and Google Workspace licences increase every year. The longer you wait, the deeper your data embeds in an ecosystem you do not control.

Progressive. Concrete. Zero downtime.

7 years of technical expertise

Trained at École 42. Experience across startups and large enterprises. Hands-on expertise, not theoretical consulting.

Sovereign hosting

Our infrastructure is hosted by Infomaniak in Switzerland. We practise what we recommend to our clients.

Zero-downtime migration

Progressive approach: your teams keep working throughout the entire transition with no data loss.

Public sector ready

Formal quotations available. Compliant with public procurement procedures and tender requirements.

End-to-end support, from audit to ongoing care.

FLAGSHIP SERVICE

Sovereign migration

Full replacement of Google Workspace and Microsoft 365 with sovereign solutions: Nextcloud, OnlyOffice, Mattermost. Guaranteed service continuity throughout the transition.

Inclus :

- ▣ Detailed migration plan
- ▣ Full technical execution
- ▣ User training included
- ▣ Post-migration support

IT Sovereignty Audit

Full IT system mapping, GAFAM dependency identification, GDPR/NIS2 risk report with prioritised recommendations.

Sovereign Infrastructure

Deployment on FR/EU cloud (Scaleway, OVH, Infomaniak). Secure config, monitoring, automated backups.

Team Training

Practical workshops for IT and end-user teams. On-site or remote, tailored to your context.

Support & Operations

Proactive monitoring, security updates, user support. Monthly contract with defined SLA.

Sovereign AI

Open-source LLMs and local RAG in your workflows. Zero dependency on OpenAI or Azure.

— TECHNOLOGY STACK
